Fund Facts

Objective:	Capital Appreciation
Dividend Schedule:	Annually
Benchmark Index:	Russell Midcap Growth® Index
Morningstar Style:	Mid-cap Growth

Initial Investment Minimum

Class A and C shares	\$1,000
Retirement account minimum	\$500
Periodic investment plan (see prospectus for details)	\$50

See prospectus for Class I and R share requirements.

Characteristics

Total net assets	\$2.16 billion
Number of holdings	88
Market cap (weighted average) ¹	\$18.11 billion

	FUND	BENCHMARK
Standard Deviation ²	12.09	11.05
Beta ³	1.06	—

¹ Weighted average market capitalization first arranges the fund's holdings from highest to lowest by total market value and then by its percentage of the fund's total net assets. Source: FactSet.

² 3-year Trailing Standard Deviation measures historical volatility of returns.

³ 3-year trailing Beta measures the security's volatility in relation to its benchmark index. Source: Morningstar Direct®

Management

Bert L. Boksen, CFA

Managing Director of Eagle Asset Management's mid- and small-cap growth strategies since 1995. He has been a manager of the fund since inception. Boksen has 40 years of investment experience.

Eric Mintz, CFA

Portfolio Co-manager of the fund. Mintz has been co-managing the portfolio since 2011, and previously served as assistant portfolio manager since 2008. He has 22 years of investment experience and holds an MBA from the University of Southern California. Mintz has been a manager of the fund since 2008.

Christopher Sassouni, DMD

Assistant Portfolio Manager of the fund. Sassouni has 27 years of investment experience as an analyst and president of an independent investment research firm focused on healthcare. He has been a manager of the fund since 2006.

Eagle Asset Management, Inc. is the sub-advisor to the Eagle Mid Cap Growth Fund and an affiliate of Carillon Tower Advisers, Inc., the Investment Adviser.

Strategy

- The managers seek to identify companies, both emerging and established, that may be undiscovered or undervalued in the market and have the potential for a step-change in their earnings growth rate.
- The team uses proprietary screens and in-depth fundamental research to evaluate financial health and growth potential. Because the team's primary focus is on individual companies, they place the highest value on their own research and analysis.
- The portfolio managers focus primarily on stocks with a market capitalization at time of purchase below the ceiling established by the Russell Midcap Growth Index.

Goals

- Invest in companies with above-average growth potential due to a positive catalyst for growth, such as a new product, acquisition, divestiture, restructuring or change in the marketplace
- Add value through continuous research, gathering industry data to support/challenge the investment thesis and monitor relative strength to identify potential problems
- Construct a well-positioned portfolio, diversified by industry and company to reduce the impact of a single holding

If the sales charge had been included, the calendar year returns would have been lower.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance at offer reflects a front-end sales charge of 4.75 percent for Class A shares; a contingent deferred sales charge of 1 percent for Class C share redemptions made earlier than one year after purchase. Performance data quoted reflects reinvested dividends and capital gains. Returns of less than one year are not annualized. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800.421.4184 or visiting eagleasset.com.

Performance "at NAV" assumes that no front-end sales charge applied or the investment was not redeemed. Performance "at offer" assumes that a front-end sales charge applied to the extent applicable.

Class I and R shares are only available to certain investors. See the prospectus for more information.

Please consider the investment objectives, risks, charges, and expenses of any fund carefully before investing. Contact Carillon Fund Services at 800.421.4184 or your financial advisor for a prospectus, which contains this and other important information about the funds. Read the prospectus carefully before you invest or send money.

The Russell Midcap Growth® Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000 Growth Index. It is not possible to invest in an index.

Investments in mid-cap companies generally involve greater risks than investing in larger capitalization companies. Mid-cap companies often have narrower commercial markets, more limited managerial and financial resources, and more volatile trading than larger, more established companies.

Growth companies are expected to increase their earnings at a certain rate. When these expectations are not met, investors may punish the stocks excessively, even if earnings showed an absolute increase. Growth company stocks also typically lack the dividend yield that can cushion stock prices in market downturns. The companies engaged in the technology industry are subject to fierce competition and their products and services may be subject to rapid obsolescence. The values of these companies tend to fluctuate sharply.
